NFPA 72 Requirements for Plan Review and Documentation of Fire Alarm Submittals

Safety Design in Buildings Conference
November 21, 2016, Crowne Plaza Muscat

Presented by: Wail AlMuharzi

Course Description

The plan review and documentation of the design and subsequent acceptance to the Authority Having Jurisdiction (AHJ) for fire alarms systems will be addressed in this presentation. Most of the fire alarm plans submitted for review and comment experience delays in the approval process by the AHJ due to absence of details on the plans and incomplete documentation. The presentation will address the cases behind the delays and describe the minimum documents required by NFPA 72 to help the designer to avoid delays to their projects and make obtaining permits easier.

The content of the presentation will describe the importance of each documents required by NFPA 72 and the best way to document those requirements. At the end of the presentation, the attendances should be able to understand what is the minimum document submittal requirement to obtain approval for the fire alarm design or permit issuance at different stages of the project. Those who submit drawings approval to third party consultancy or AHJ for approval will benefit from the presentation.

Presenter

Wail Almuhrzi, P.E, MSc. Fire Safety Engineering

Managing Director - Muscat

Aman Fire Protection Consultants

Wail is the founder and managing director of Aman Fire Engineering Consultants (Aman FEC). His extensive background in fire protection engineering spans over 10 years' including building and fire code development, code consulting, active and passive fire protection and specifications.

Wail has a Bachelor of Civil Engineering from Sultan Qaboos University and a Master's of Fire Safety Engineering from the University of Central Lancashire.

His primary specialties include fire protection and life safety engineering and consulting, performance of site fire and life safety audits and surveys, project meetings with clients and authorities having jurisdiction, preparation of fire strategy reports, review of fire protection system designs, project management, and participation in business development activities.

Learning Objectives

1. *Provide guideline to help the designers of the fire alarm and detection system on how to provided complete design package*
2. *Provide better understanding on the minimum details required to be shown for design review or approval and Address the importance of these submittals.*
3. *Address reasons and examples behind approval delays*
4. *Address the common mistakes or missing details that are required be provided per NFPA 72*

- The purpose of this presentation is to convey technical knowledge to the conference participants.
- The presentation also contains slides with text that summarises the content of the presentation and the main learning objectives.
- These may be used to update CPD records for relevant organisations including the Chartered Institute of Building (CIOB).

Fire Alarm and Detection System

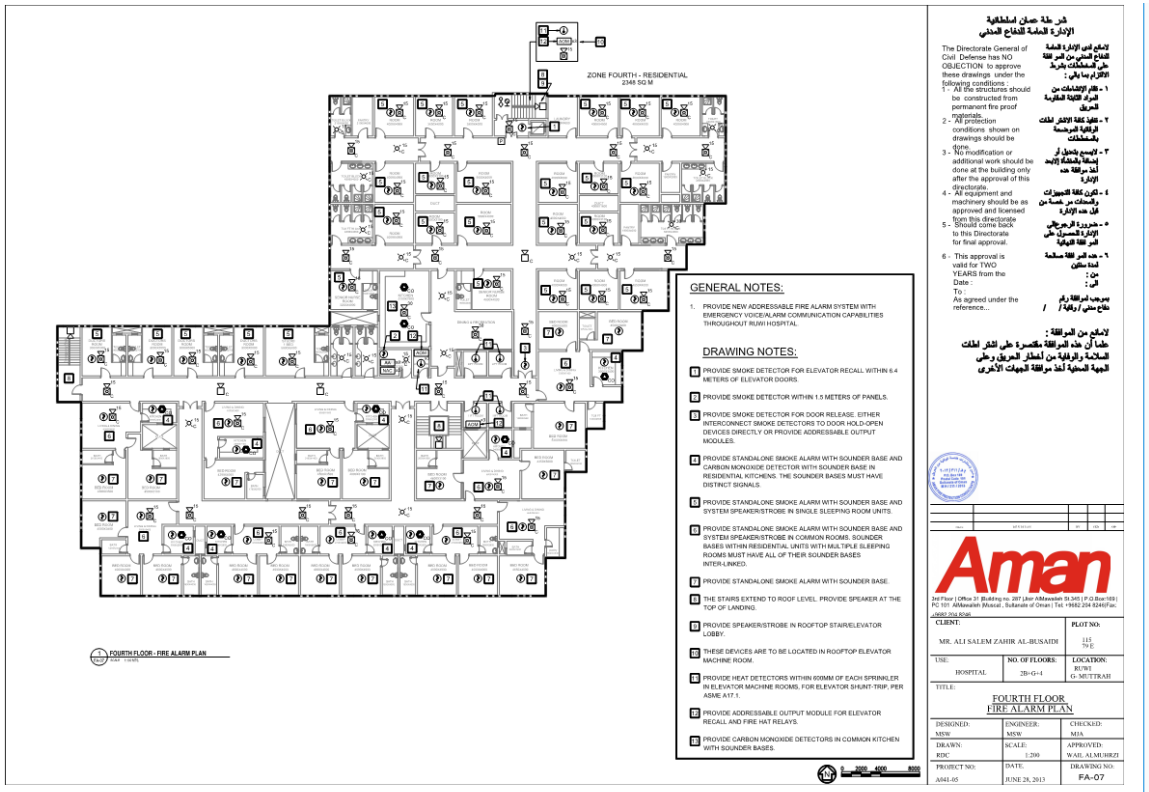
Fire Alarm system

Prepare a conceptual fire alarm detection and notification system layout for the proposed facility.

Drawings shall identify required

- ✓ Control panels
- ✓ Sequence of operation
- ✓ Notification appliances
- ✓ Fire alarm initiating devices
- ✓ Locations of smoke detectors
- ✓ Connections to fire protection and building systems, and necessary connections to off-site monitoring facilities. Applicable codes

Provide Fire Alarm System Note



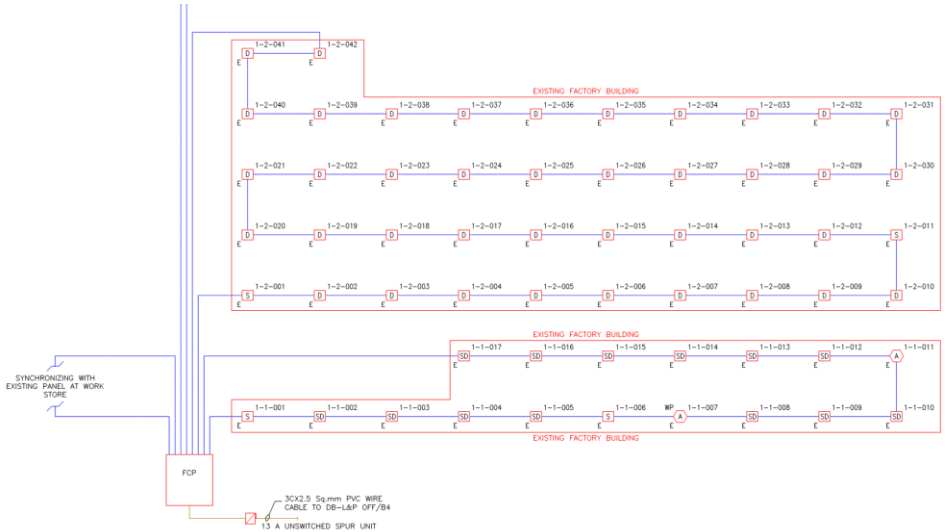
Documentation

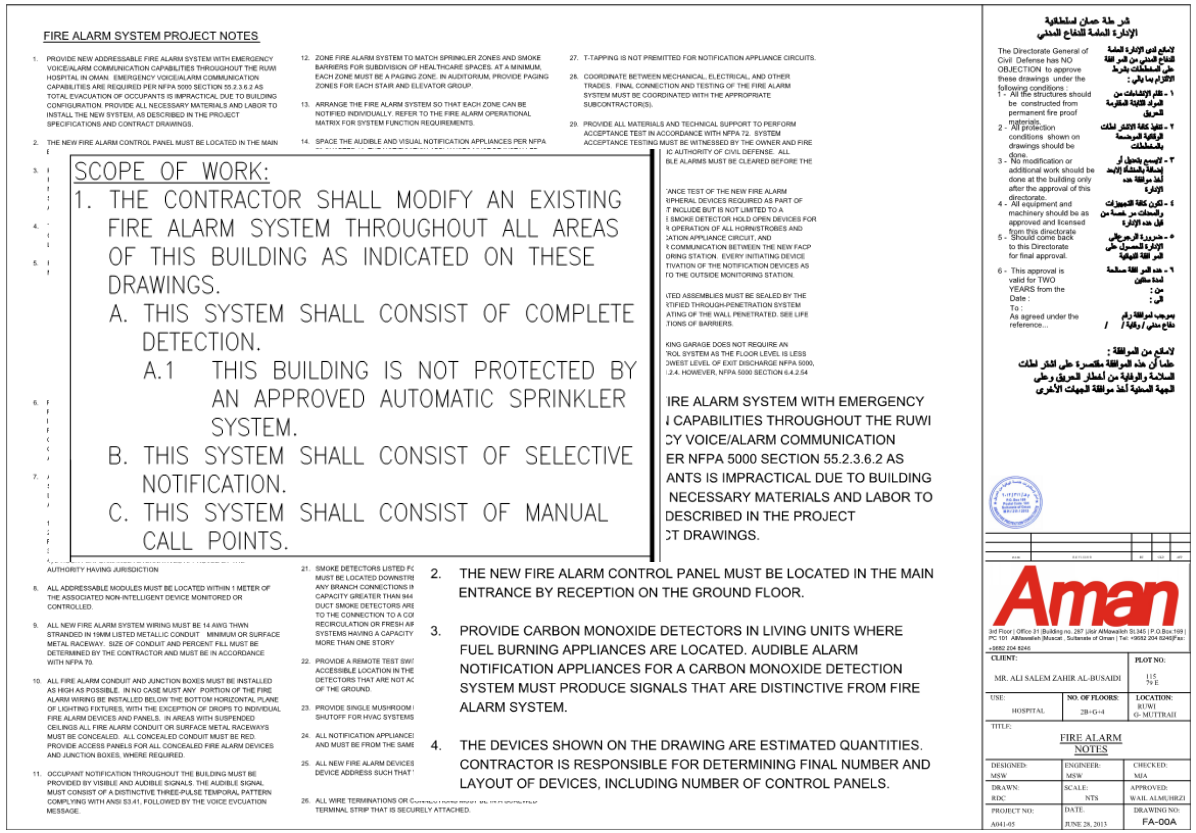
7.2 Minimum Required Documentation	7.3 Design Drawings	7.4 Shop Drawings (Installation) drawings
• For New System • For Existing addition and alternation	• Apply only where required by other governing laws, codes or standards • Project specification	• Apply only where required by other governing laws, codes or standards • Project specification

Documentation Submittal Requirements

7.2.1 Minimum Required Documentation

- Description for the design intent (Scope)
- Riser Diagram





FIRE ALARM SYSTEM PROJECT NOTES

SCOPE OF WORK:

1. THE CONTRACTOR SHALL MODIFY AN EXISTING FIRE ALARM SYSTEM THROUGHOUT ALL AREAS OF THIS BUILDING AS INDICATED ON THESE DRAWINGS.
   - A. THIS SYSTEM SHALL CONSIST OF COMPLETE DETECTION.
     - A.1 THIS BUILDING IS NOT PROTECTED BY AN APPROVED AUTOMATIC SPRINKLER SYSTEM.
   - B. THIS SYSTEM SHALL CONSIST OF SELECTIVE NOTIFICATION.
   - C. THIS SYSTEM SHALL CONSIST OF MANUAL CALL POINTS.

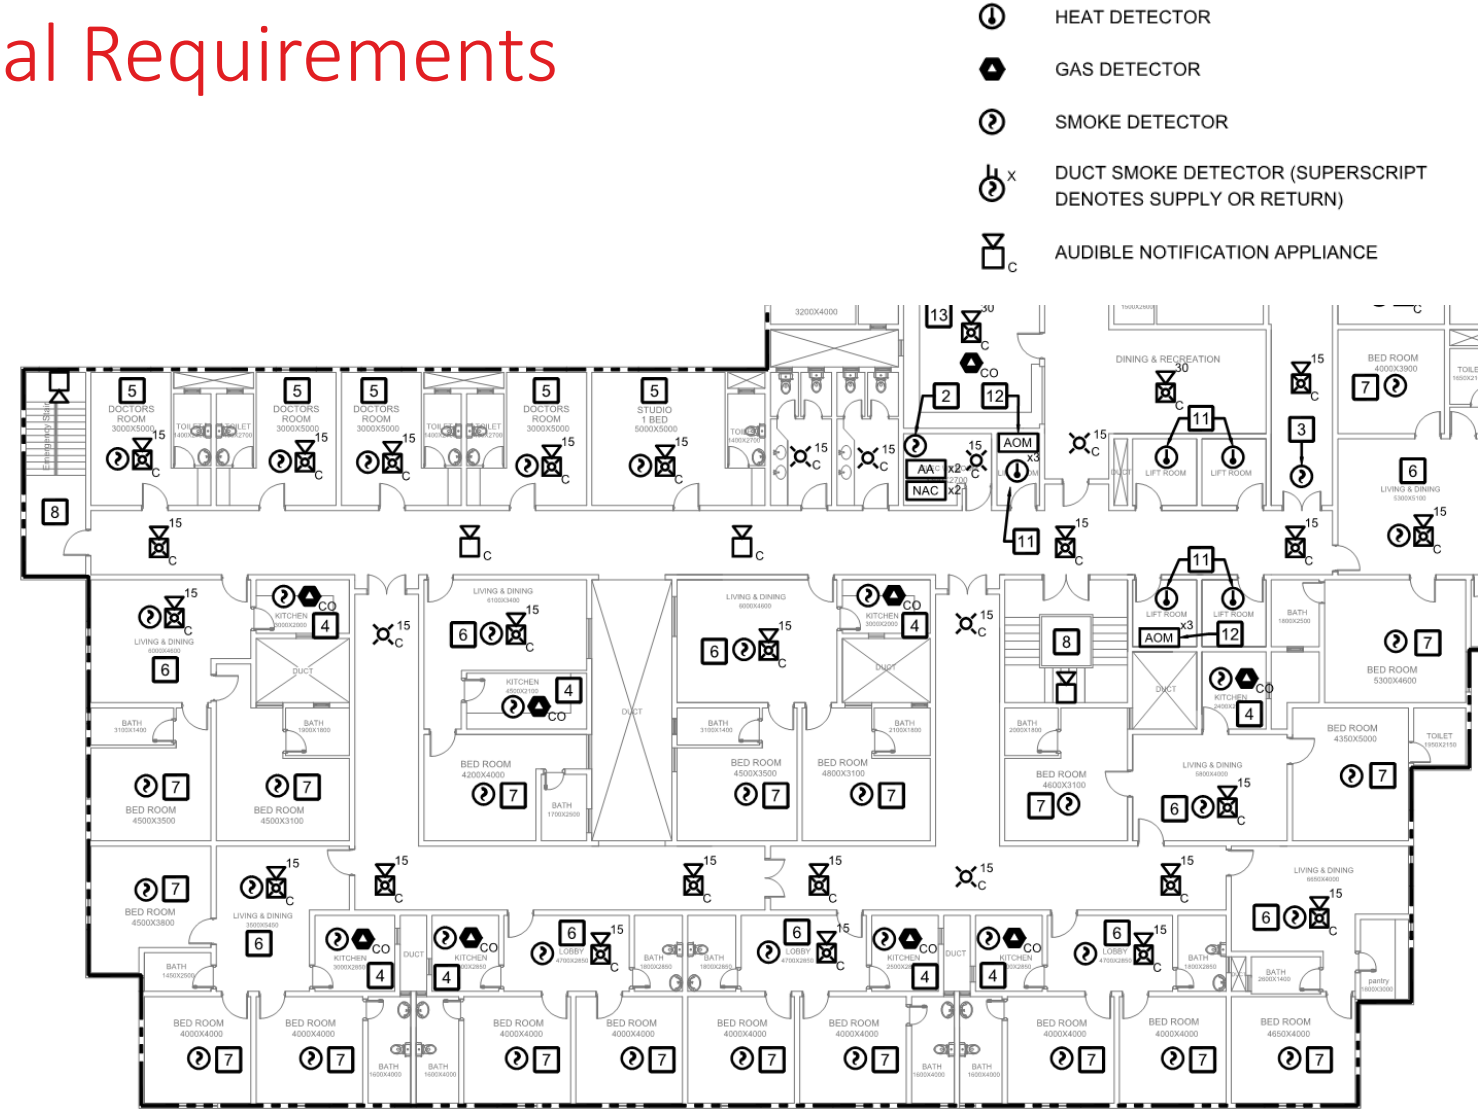
2. THE NEW FIRE ALARM CONTROL PANEL MUST BE LOCATED IN THE MAIN ENTRANCE BY RECEPTION ON THE GROUND FLOOR.
3. PROVIDE CARBON MONOXIDE DETECTORS IN LIVING UNITS WHERE FUEL BURNING APPLIANCES ARE LOCATED. AUDIBLE ALARM NOTIFICATION APPLIANCES FOR A CARBON MONOXIDE DETECTION SYSTEM MUST PRODUCE SIGNALS THAT ARE DISTINCTIVE FROM FIRE ALARM SYSTEM.
4. THE DEVICES SHOWN ON THE DRAWING ARE ESTIMATED QUANTITIES. CONTRACTOR IS RESPONSIBLE FOR DETERMINING FINAL NUMBER AND LAYOUT OF DEVICES, INCLUDING NUMBER OF CONTROL PANELS.

Fire Protection and Life Safety Consulting Services

Documentation Submittal Requirements

7.2.1 Minimum Required Documentation

- Floor plan layout showing the locations of all of the following :
  - Devices
  - Appliances
  - Control equipment
  - Supervising station and
  - shared communications equipment
- Drawings formats to consider the following:
  - Graphic representation of the scale used
  - Room use identification
  - Room or space features that will affect the placement of initiating devices and notification appliances
  - Use NFPA 170 symbols



Fire Protection and Life Safety Consulting Services

Documentation Submittal Requirements

7.2.1 Minimum Required Documentation

- Sequence of operation either as a narrative or an input/output matrix

- Equipment technical data sheets

- Manufacturer's published instructions

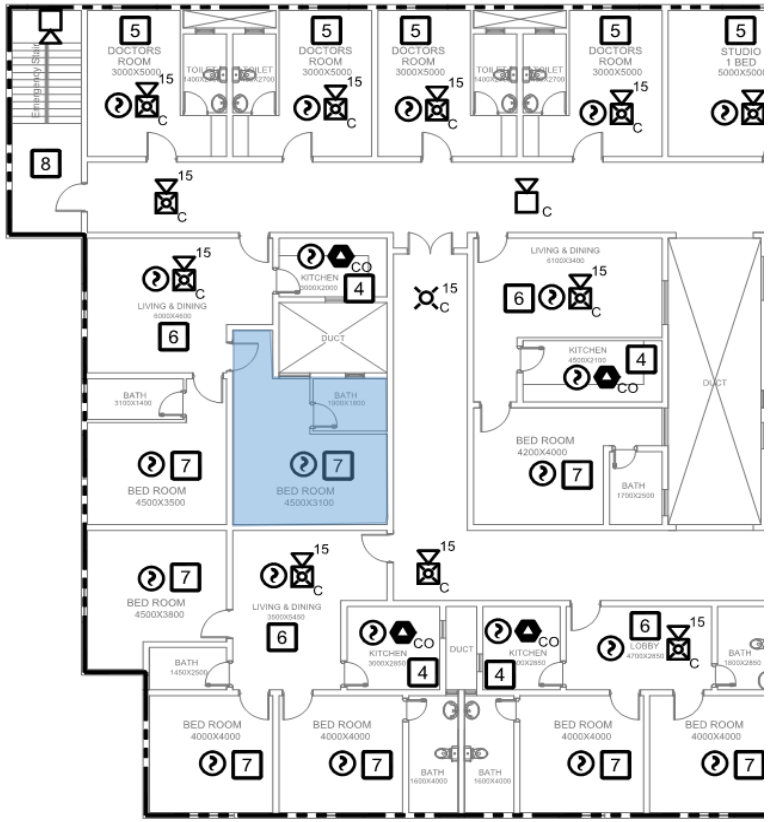
#	Review Question			
1	Control panel type match approved design and submittals?	☐ Yes	☐ No	☐ N/A
2	Control panel location match approved design and submittals?	☐ Yes	☐ No	☐ N/A
3	Annunciator type match approved design and submittals?	☐ Yes	☐ No	☐ N/A
4	Annunciator location match approved design and submittals?	☐ Yes	☐ No	☐ N/A
5	Amplifier type and capacity match approved design and submittals?	☐ Yes	☐ No	☐ N/A
6	Notification appliance extender panel type match approved design and submittals?	☐ Yes	☐ No	☐ N/A
7	Notification appliance extender panel location match approved design and submittals?	☐ Yes	☐ No	☐ N/A
8	Supervising station connection equipment match approved design and submittals?	☐ Yes	☐ No	☐ N/A
9	Releasing panel type match approved design and submittals?	☐ Yes	☐ No	☐ N/A
10	Releasing panel locations match approved design and submittals?	☐ Yes	☐ No	☐ N/A
11	Remote microphone/paging station type match approved design and submittals?	☐ Yes	☐ No	☐ N/A
12	Remote microphone/paging location match approved design and submittals?	☐ Yes	☐ No	☐ N/A

7.3 Design (Layout) Documentation

7.3.4 Notification

- The minimum Sound Pressure Level to be provided in areas where audible notification is required in accordance with 18.4.1.4.3
- Narrow band tone signaling if used in accordance with 18.4.6.4
- specify rooms and spaces that will, and will not, have visible signaling in accordance with 18.5.2.1 (Area To be Hatched)

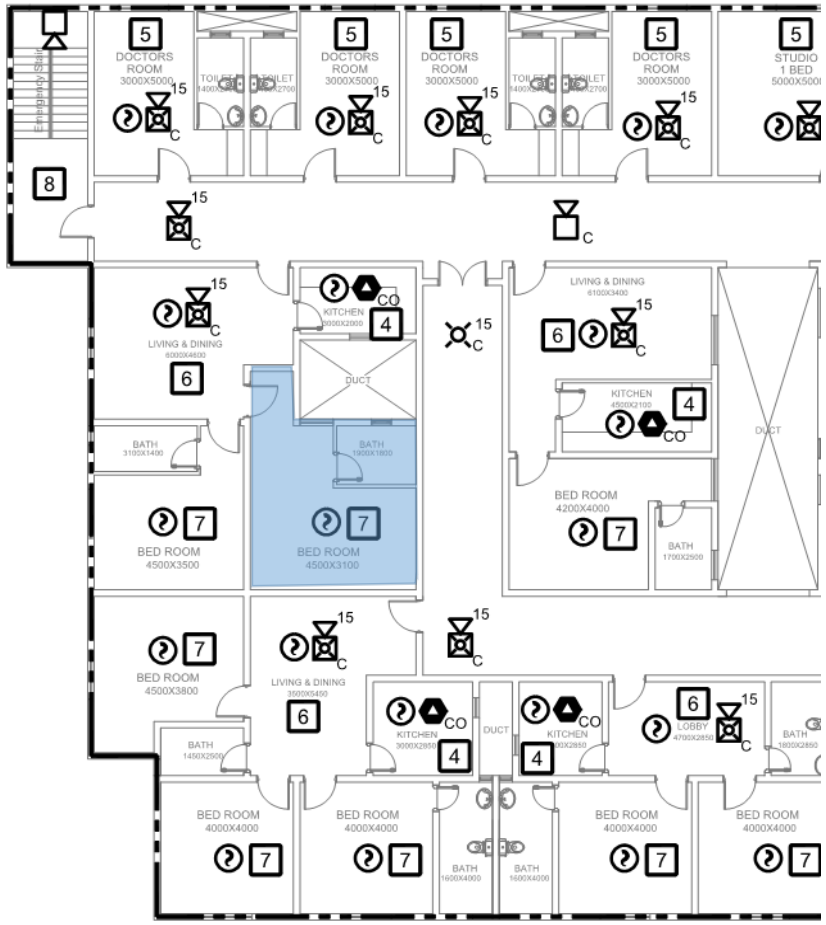


Hatch area show area that dose not have visible signaling

7.3 Design (Layout) Documentation

7.3.4 Notification

- Acoustically Distinguishable Spaces (ADS) in accordance with 18.4.10



Fire Protection and Life Safety Consulting Services

7.3 Design (Layout) Documentation

7.3.5 Detection

- Heat in accordance with 17.6
- Smoke in accordance with 17.7
- Radiant energy-sensing in accordance with 17.8
- Gas in accordance with 17.10

INITIATING DEVICE SPACING TABLE	
P	AT EVERY EXIT AND WITHING A TRAVEL DISTANCE OF 61M
	9.1M X 9.1M
	9.1M X 9.1M
	IN VICINITY OF EACH FUEL BURNING APPLIANCE IN RESIDENTIAL AREAS

7.3 Design (Layout) Documentation

7.3.6 Risk Analysis

- Where required, the findings and considerations of the risk analysis shall be documented
- Documentation shall list the various scenarios evaluated and anticipated outcomes

7.3.7 Performance-based Design

- Documentation of all performance objectives for AHJ approval

7.3 Design (Layout) Documentation

7.3.8 Emergency Response Plan

- Various scenarios evaluated and the outcomes to be documented for AHJ approval

7.3.9 Evaluation Documentation

- Attesting statement by the person responsible for the design.

7.4 Shop Drawings (Installation) drawings

- In addition to the minimum information required by 7.2 and 7.3
- Drawings shall consider the following:
  - Drawn to Scale
  - Sheet uniform size (typically A1)
  - Plan of Each floor
  - North Direction
  - Name of protected premises, owner, and occupant
  - Name of installer or contractor
  - Date of issue and revision dates

7.4 Shop Drawings (Installation) drawings

- Floor plan drawings required information:
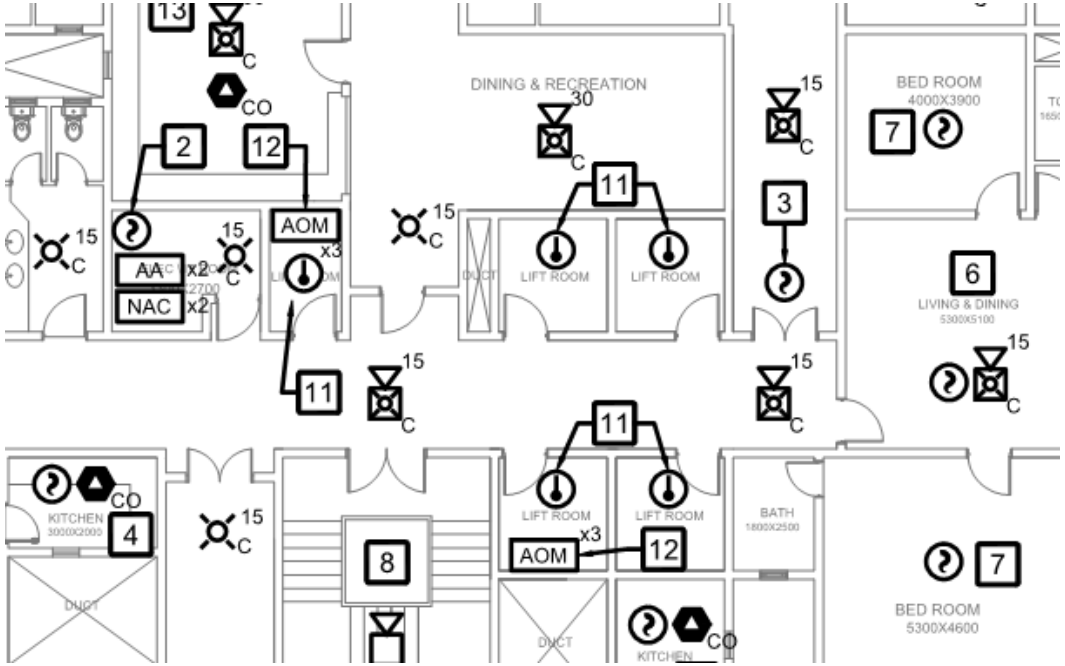
  - Room and area descriptions
  - System devices/component locations
  - Primary power disconnecting location

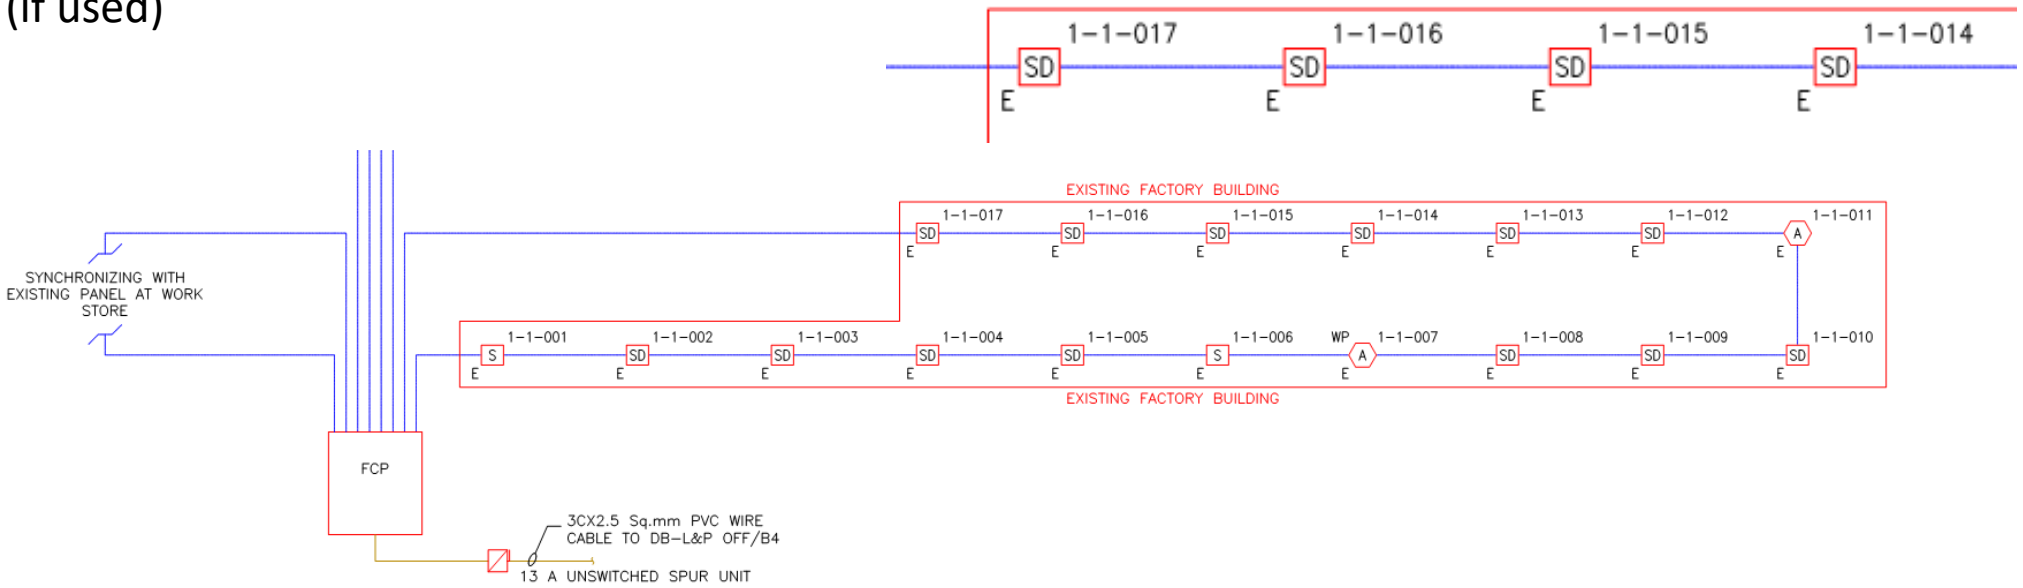
7.4 Shop Drawings (Installation) drawings

- Floor plan drawings required information:
  - Locations of monitor / control interfaces



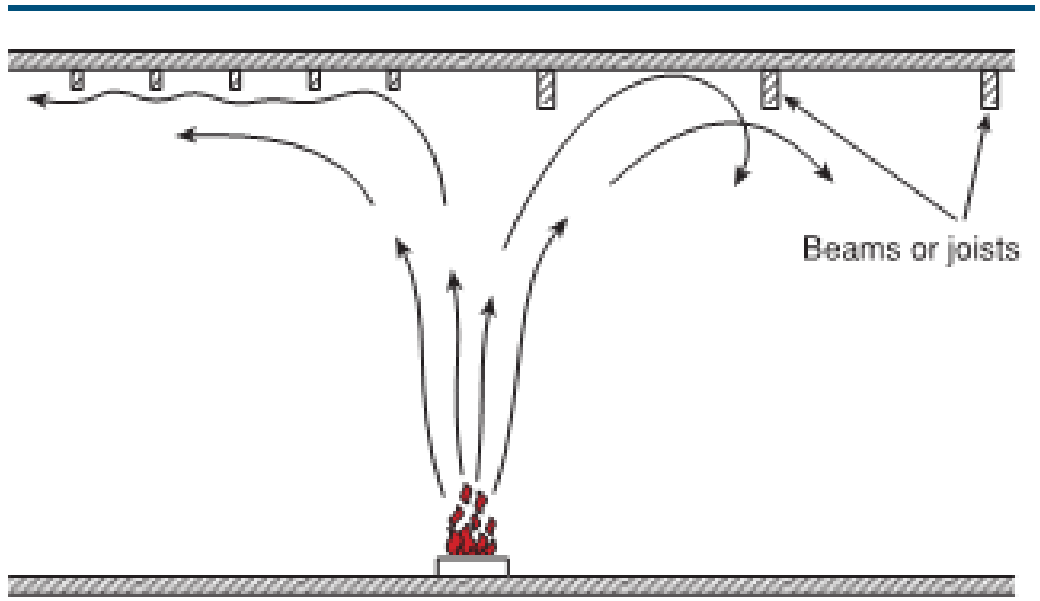
7.4 Shop Drawings (Installation) drawings

- Floor plan drawings required information:
  - Riser locations
  - Type / number of system components / devices on each circuit, on each floor or level
  - Type of quantities of conductors and conduit (if used)



7.4 Shop Drawings (Installation) drawings

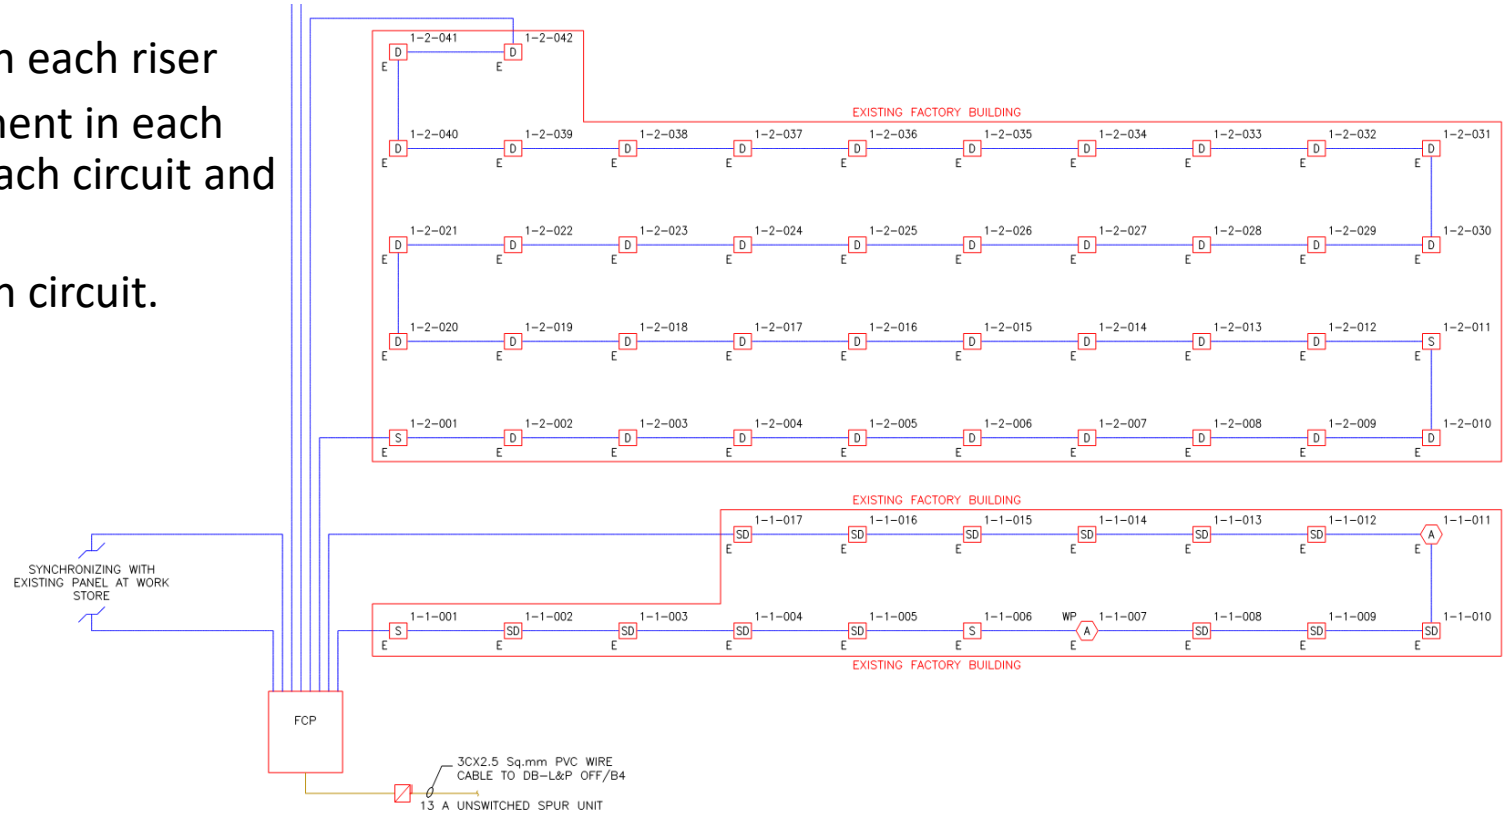
- Floor plan drawings required information:
  - Areas covered with automatic detection proposed the flowing to be identified:
    - Ceiling more than 3 m in height
    - Ceiling geometry, including beams and solid joists
    - Or provide note stating that heights are unde m unless stated otherwise



If not applicable provide note stating that heights are under 3 m unless stated otherwise

7.4 Shop Drawings (Installation) drawings

- System Riser Diagram
  - Number of risers
  - Type and number of circuit in each riser
  - Type and number of component in each components or devices on each circuit and level
  - Number of conductor in each circuit.

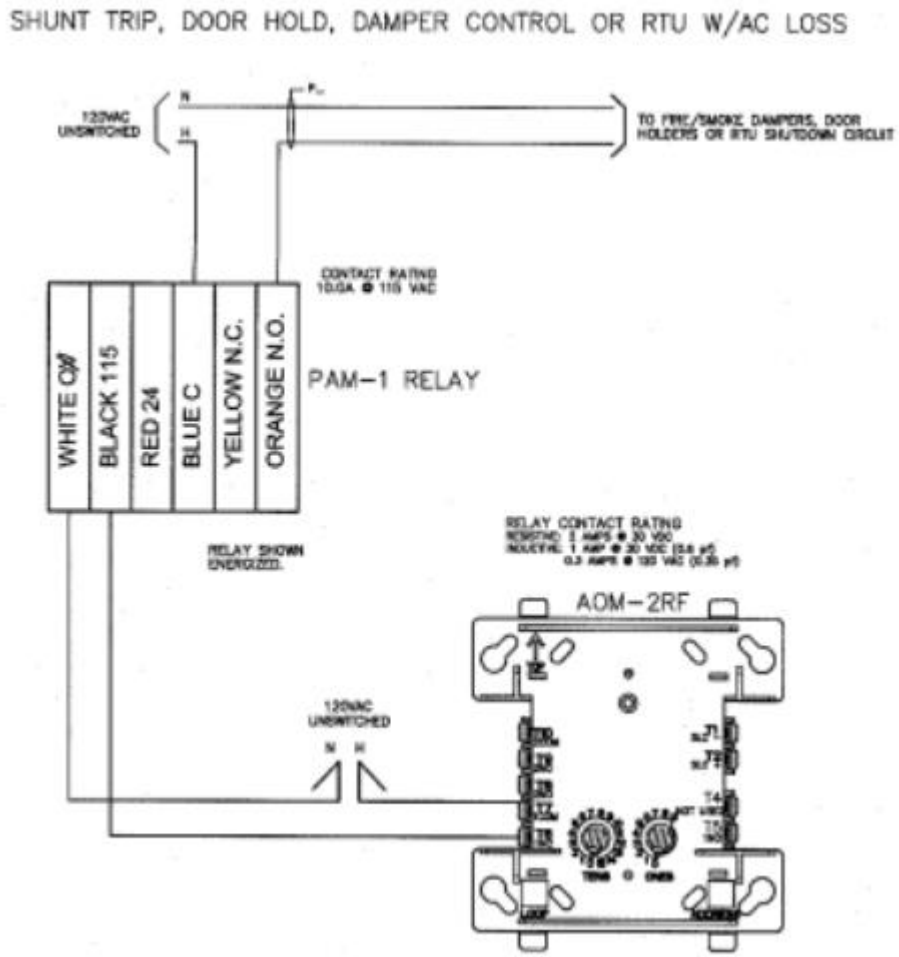


7.4 Shop Drawings (Installation) drawings

- Control unit diagram
  - Applies to equipment listed as either a control unit or control unit accessory
  - Power supplies
  - Battery chargers
  - Annunciators
  - Identification of the control equipment depicted
  - Where is the equipment located
  - Field wiring terminals and terminal identification

7.4 Shop Drawings (Installation) drawings

- Control unit diagram
  - All circuits connected to field wiring terminals and circuit identification
  - All indicators and manual controls
  - Field connections to supervising station equipment, releasing equipment, or emergency safety control equipment interfaces



Fire Protection and Life Safety Consulting Services

7.4 Shop Drawings (Installation) drawings

- Typical wiring diagrams
  - All initiating device circuits
  - All signaling line circuits
  - All notification appliance circuits
  - All control circuits

	HORN CUM STROBE - WALL MOUNTED
	EMERGENCY LIGHT
	STROBE - WALL MOUNTED
F	FIRE ALARM BOX - PULL STATION
	EXIT SIGNAGE
	DIRECTIONAL EXIT SIGNAGE - SINGLE SIDED
	DIRECTIONAL EXIT SIGNAGE - TWO SIDED
	DIRECTIONAL EXIT SIGNAGE - TWO SIDED - TWO WAY

NOTE:-

1. BASEMENTS/CAR PARKING TO BE SEPARATED FROM REMAINDER OF THE BUILDING BY MINIMUM 2 HOURS FIRE RATING
2. ALL EXIT STAIRS SHALL BE ILLUMINATED WITH EMERGENCY LIGHT IN ACCORDANCE WITH CODE COMPLIANCE.
3. ALL EXIT STAIRS FROM THE BUILDING SHALL HAVE A MINIMUM WIDTH OF 1120MM AND SHALL BE PROVIDED WITH HANDRAILS ON BOTH SIDES
4. AT LEAST ONE LEAF IN ALL DOUBLE LEAF DOOR ASSEMBLIES SHALL PROVIDE A CLEAR WIDTH OF NOT LESS THAN 810MM.
5. KITCHEN AND PANTRIES SHALL BE EQUIPPED WITH ELECTRICAL HEATING EQUIPMENT. THE KITCHEN AND PANTRIES SHALL BE ENCLOSED WITH 1 HOUR FIRE RATING IN CASE THE USE OF GAS BURNING EQUIPMENT
6. ALL EXIT DOORS SHALL BE NOT LESS THAN 810 MM IN CLEAR WIDTH.
7. LOCATIONS OF EMERGENCY LIGHTS AND NOTIFICATION APPLIANCES ARE INDICATIVE ONLY. ACTUAL SPACING, QUANTITY AND LOCATIONS SHALL BE MODIFIED BASED ON THE SELECTED DEVICES IN ACCORDANCE WITH NFPA 72 & NFPA101.
8. AUDIBLE NOTIFICATION DEVICES SHALL BE AS PER AUDIBLE CHARACTERISTICS [NFPA 72; 18.4] AND ADDITIONAL AUDIBLE DEVICES SHALL BE PROVIDED AS PER THE FINAL SELECTION OF EQUIPMENT TO FULFILL THE MINIMUM SOUND LEVEL REQUIREMENT.
9. LOCATIONS OF HEAT DETECTORS ARE INDICATIVE ONLY, SPACING REQUIREMENTS SHALL BE AS PER MANUFACTURER SPECIFICATION. SPACING SHALL BE REDUCED BASED ON CEILING HEIGHT AS PER NFPA 72; TABLE 17.6.3.5.1 AND ADDITIONAL DETECTORS SHALL BE PROVIDED TO FULFILL TOTAL COVERAGE REQUIREMENT.
10. VISIBLE APPLIANCES SHALL BE PROVIDED AS PER NFPA 72; 18.5.5.4 SPACING IN ROOMS, AS PER THE FINAL SELECTION OF EQUIPMENT.
11. AUTOMATIC DETECTION SYSTEM TO BE PROVIDED ABOVE THE FALSE CEILING WHERE ANY OF THE FOLLOWING IS APPLICABLE:
    - 11.1. SPACES ABOVE THE FALSE CEILING ARE ACCESSIBLE
    - 11.2. THE MATERIALS INSTALLED ABOVE THE FALSE CEILING ARE COMBUSTIBLE. ALSO IF THE MATERIALS ABOVE THE FALSE CEILING ARE COMBUSTIBLE, THESE LOCATIONS SHALL BE MADE ACCESSIBLE AS PER THE CODE REQUIREMENTS
12. FIRE ALARM CONTROL PANEL SHALL BE LOCATOR IN THE MAIN ENTRANCE OF THE GROUND FLOOR.
13. FIRE DETECTION AND NOTIFICATION SYSTEM SHALL BE DESIGN, INSTALLED , TESTED AND COMMISSIONED IN ACCORDANCE WITH NFPA 72.
14. NUMBER AND LOCATIONS OF FIRE AND GAS DETECTOR ARE TENTATIVE ONLY, THE QUANTITY AND LOCATION SHALL BE VERIFIED DURING DETAIL DESIGN.
15. ALL WALL MOUNTED AUDIBLE AND VISIBLE NOTIFICATION APPLIANCES MUST BE INSTALLED A MINIMUM OF 2.03 MTR AND MAXIMUM OF 2.44 MTR ABOVE THE FINISHED FLOOR, AS PER NFPA 72.
16. TOILET ASSUMED TO BE NOT FULL HEIGHT PARTITIONS.
17. STAIR THAT CONTINUE MORE THAN ONE HALF STORY BEYOND THE LEVEL OF DISCHARGE SHALL BE PROVIDED WITH AN APPROVED MANS TO PREVENT OCCUPANTS FROM TRAVELING PAST THE LEVEL OF DISCHARGE DURING EMERGENCY BUILDING EVACUATION.
18. ALL EXIT RAMPS SHALL BE HAVE A MINIMUM SLOPE OF 1:12%.
19. ELECTRICAL ROOM AND BATTERY ROOMS SHALL BE ENCLOSED WITH 2-HOURS RATED CONSTRUCTION PER PACDA REQUIREMENT.
20. IN BUILDING PROTECTED THROUGHOUT BY AN APPROVED SUPERVISED AUTOMATIC SPRINKLER SYSTEM, EACH HOTEL GUEST ROOM, INCLUDING GUEST SUITE SHALL BE SEPARATED FROM OTHER GUEST ROOM BY WALLS AND FLOORS CONSTRUCTED AS FIRE BARRIERS HAVING FIRE RESISTANCE RATING OF NOT LESS THAN HALF HOURS

شروط إعلان الدفاع المدني العام للإدارة العامة

The Directorate General of civil Defense has NO OBJECTION to approve these drawings under the following conditions :

1. All the structures should be constructed from permanent fire proof materials.
2. All protection conditions shown on drawings should be done.
3. No modification or additional work should be done at the building only after the approval of this directorate.
4. All equipments & machineries should be as approved and licensed from this directorate.
5. Should come back to this directorate for the final approval
6. This approval is valid for TWO YEARS from the date : to: As agreed under the reference...

إن مدير عام الدفاع المدني العام لا مانع لديه من الموافقة على الرسومات المعتمدة بالشروط التالية :

١ تنشأ جميع المنشآت من المواد المقاومة للحريق.

٢ تنفذ جميع الاشتراطات الموضحة بالرسومات.

٣ لا يسمح بإجراء أي تعديل أو إضافة بدون الرجوع إلى هذه الإدارة.

٤ تكون جميع المعدات والآلات مرخصة من قبل هذه الإدارة.

٥ ضرورة الرجوع إلى الإدارة للحصول على الموافقة النهائية.

٦ هذه الموافقة صالحة لمدة سنتين من تاريخ : إلى : كما هو مذكور في المراسلة رقم / /

إلزام بأن هذه الموافقة مقتصرة على الاشتراطات السابقة والموافقة من الدفاع المدني والجهة الصحية أخذ موافقة الجهات الأخرى

Aman
Fire Protection and Life Safety Consulting Services

Documentation Submittal Requirements

Rooms not labeled with a name or use on the drawings

Rooms numbered but not without a legend that describes their use

Control units (FACU) not listed for their intended use (Local, Remote Station, Central Station or Proprietary service)

Documentation Submittal Requirements

Failure to provide the correct standby power based on:

- Local requirements
- Minimum code requirements
- 24 hrs + 15 min. (EVAC systems)
- 24 hrs + 5 min. (Other systems)
- 20% safety factor requirement
- Systems with auto-start generator (4 hours standby)

Documentation Submittal Requirements

FACU or an annunciator not located to provide ready access by the responding personnel (was the FD consulted)

Documentation Submittal Requirements

Failure to provide monitoring and interface relay equipment for:

- Elevator Phase I for Emergency
- Recall Operation Elevator
- Shutdown
- Elevator Warning Signal

Documentation Submittal Requirements

Initiating devices not provided with mechanical guards (listed) where subject to physical damage. (17.4.2)

Documentation Submittal Requirements

Where heat or smoke detection is proposed:

Failure to indicate ceiling height and configuration

Failure to show solid beams and joists

Documentation Submittal Requirements

Waterflow and pressure devices not located on the drawings to the extent provided by the sprinkler contractor

Vane type Pressure type

Control valves

Documentation Submittal Requirements

Failure to include fire alarm equipment modules for:

Pressure monitoring(high/low air)

Water level monitoring Water temperature

Room temperature (17.16)

Documentation Submittal Requirements

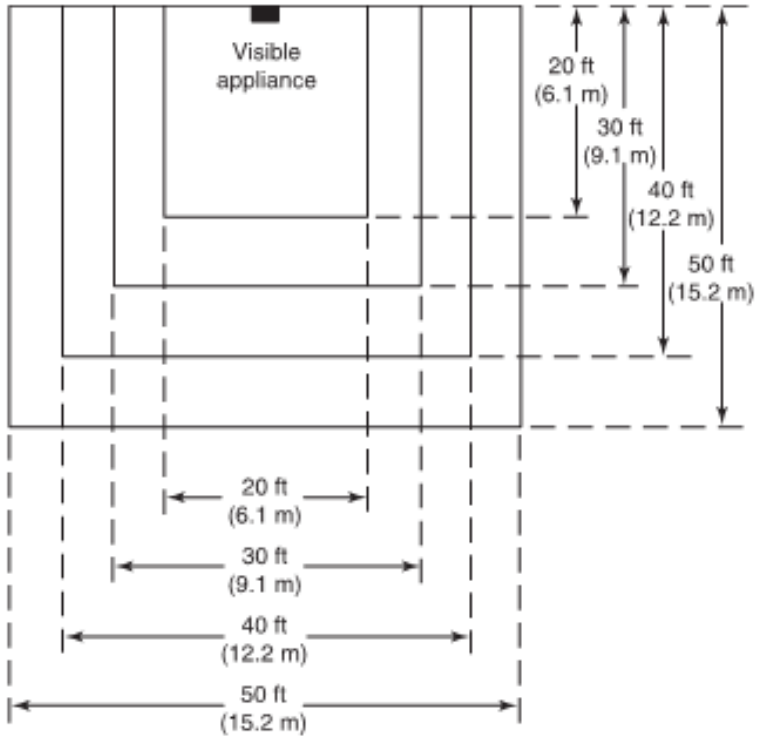
Failure to locate Notification Appliances according to Chapter 18

Candela setting not appropriate for room size

Corridor spacing/candela settings

Wall-Mounted Visible Appliance

Max. Room Size meters	Minimum cd One light per room
6.1 X 6.1	15
8.53 X 8.53	30
13.7 X 13.7	75
16.5 X 16.5	110
16.8 X 16.8	115
18.3 X 18.3	135
19.2 X 19.2	150
20.7 X 20.7	177



Documentation Submittal Requirements

Failure to identify circuit information on the plans:

Circuit gauge

Survivability (where applicable) Location of circuits (plenums)

Circuits identified that exceed the maximum devices permitted by code or the manufacturer
